To Whom it may Concern,

Re: Air Traffic Control Trainee 495788

My name is Thomas Loch and I am 26 years of age. I have studied a Bachelor of Aviation and a Graduate Diploma in Flight Management at Griffith University, Nathan campus. Part of the Griffith program was obtaining a Commercial Pilot Licence with MECIR, however my licence is not current. Whilst looking for employment in the aviation industry I worked for Aldi where I quickly climbed the ranks to store management trainee. This entails that I am capable of running a store in the absence of the store manager. Since Aldi I have obtained a position within the electronics industry.

I am a great problem solver, and I am always looking for different ways to tackle problems. I have strong computer skills, and I am proficient with MS Office. I am able to work both independently and as part of a team. I set my own targets and stick with them.

I have developed many skills during my aviation training which are applicable to this position. Some of these skills are: The ability to prioritise tasks according to company standards and safety requirements. The ability to function to a high degree under extreme stresses, where the situation has a possible loss of life outcome.

I am applying for this position as I am looking for a career that will challenge me daily, and provide me with great job satisfaction.

I will be happy to relocate to Melbourne for the initial training, and then to wherever I am needed to satisfy my job requirements. I have no preference to where I will be based upon completion as I look forward to exploring more of the country. I am also happy to sign a 5 year bond with Airservices, as I am looking for a long term career.

I am disciplined, hardworking, and very reliable. I would make a great addition to your team.
I thank you for this opportunity, and hope to hear from you soon

Kind Regards,

Thomas Loch
